

Mycoplasma pneumoniae

PCR Kit | 100 reactions & 25 reactions

HIGH SENSITIVITY AND SPECIFICITY

Secured by targeting the multicopy sequence of the **M181 gene**

EASY-TO-USE CONCEPT

- Single tube Ready-to-Use Master Mix contains all components for PCR amplification
- No additional PCR reagents pipetting necessary

CONTAMINATION PREVENTION

Master Mix contains Uracil-DNA glycosylase (UNG) and dUTPs eliminating carryover contamination

SIMPLE LABORATORY WORKFLOW

Easily combinable with other GeneProof PCR kits in one workflow
